Supervision and decision-support

Analysing security events is complex and time-consuming. The intuitive visual display provided by Stormshield Visibility Center allows you to quickly identify significant events and security incidents.

Numerous dashboards

- Enhancement of your fleet's reputation
- Geolocation of the origin of threats (viruses, spam or hacks)
- Identification of vulnerable equipment

Customisable interface

- Easy dashboard creation
- Adaptation of visual display for enhanced readability

Improved security

- Simplified event search
- Centralised management

SNS log search views

SNS views of network usage

FEATURES LIST

EVENT MANAGEMENT
- Collection of events via syslog (TCP, UDP)
- Secure collection via syslog-tls
- Storage in ELK database
- Log rotation and archiving
- Event forwarding via syslog

DASHBOARDS
- Intuitive dashboards
- Simplified filtration and sorting of data
- Customisation of existing dashboards
- Creation of visual displays

MAIN THEMES OF VISUAL DISPLAYS
- Network activities (protocols, volumes)
